CONSENT TO ENDODONTIC THERAPY

Note: Please review the following consent. You are required to sign it prior to the initiation of treatment; however, it does not commit you to treatment.

This is my consent to the endodontic procedures indicated and any other procedures deemed necessary or advisable as a corollary to the planned endodontic therapy performed by Dr. Frederick L. Canby and any assistant they may require. I agree to the use of local anesthesia, depending upon the judgment of the doctor(s). **Complications of root canal therapy and anesthesia may include swelling, pain, trismus (restricted jaw opening), infection, bleeding, sinus involvement, and numbness or tingling of the lip, gum, or tongue, which rarely is protracted and even more rarely is permanent. I understand that it is my responsibility to report any symptoms to the endodontist immediately.**

I understand that root canal therapy is a procedure to retain a tooth, which may otherwise require extraction and that as a specialty practice, the office performs only endodontic therapy and associated surgery. Although root canal therapy has a very high degree of success, results cannot be guaranteed. Occasionally, a tooth, which has had root canal therapy, may require treatment, surgery, or even extraction. Following treatment, the tooth may be brittle and subject to fracture. A restoration (filling) and/or post and core, crown will be necessary to restore the tooth to function. I understand that I will be referred back to my general dentist to perform this restorative work. During treatment there is the possibility of instrument separation within the root canals, perforations (extra openings), damage to bridges, existing fillings, crowns, porcelain veneers, missed canals, loss of tooth structure in gaining access to canals, and fractured teeth. Also, there are times when a minor surgical procedure may be indicated or when my tooth may not be amenable to endodontic treatment at all. Other treatment choices include: no treatment, waiting for more definitive symptoms to develop, or tooth extraction. Risks involved in these choices might include but are not limited to pain, infection, swelling, loss of teeth and infection to other areas.

At times, medication will be prescribed by the endodontist. I understand that medications for discomfort and sedation may cause drowsiness, which can be increased by the use of alcohol or other drugs. I am advised against the use of alcohol or operating any vehicle or hazardous devices while taking such medications. I further understand that certain medications may cause hives and intestinal problems and if any of these reactions occur, I am to call this office immediately. I understand that it is my responsibility to report any changes in my medical history to the doctor(s).

If there is anything that you do not understand about the endodontic procedure, or any statement in this form, or if you still have any questions after reading this form and talking to the doctor, please write your questions below. If you have no questions, please write "NONE".
